Description

Spectro Marine Extreme Full Synthetic PWC is the ultimate two-cycle lubricant formulated specifically for use in modern two-cycle watercraft. A fully synthetic formulation with breakthrough additive technology (polybutenes, borated polyisobutenyl succinic anhydride nitrogen functionalized dispersant, mixed calcium alkylaryl detergent) combines to provide virtually smokeless operation and residue-free engine cleanliness. No oil anywhere burns cleaner than this JASO FC + ISO-EGD PLUS oil.

Application

Spectro Marine Extreme Full Synthetic is formulated specifically for use in all modern, two-cycle watercraft regardless of make or model.

For Racing Use

Spectro Marine extreme Full Synthetic can be mixed at the manufacturers' recommended ratio or used in injector systems. Otherwise, mix thoroughly at a 50:1 fuel to oil ratio (2.5 ounces per gallon, 12.5 oz to five gallons). No special steps need to be taken when switching to Spectro Marine Extreme Full Synthetic.
